The neuroendocrine tumour interest group *UK NETWORK* was first established in the year 2000. Following successful annual conferences, development of clinical trials and publication of national guidelines there has been increasing enthusiasm and rationale for a larger formal society. Thus we have formed the **UK and Ireland Neuroendocrine Tumour Society** (UKI NETS) which aims to promote research, education, training and best clinical practice across a multidisciplinary area in the field of endocrine tumours. UKI NETS has amongst its members leading endocrinologists, gastroenterologists, oncologists, surgeons, radiologists, nuclear medicine physicians and pathologists to promote multidisciplinary collaborations. A national study on chemotherapy in NETs is currently being coordinated as well as an international study on the role of somatostatin analogues as anti-tumour agents in non-functional NETs. UKI NETS is active in preliminary trials of new agents. The offshoot from such studies is the ability to collect samples for basic science research. There are currently UKI NETS sponsored studies assessing chromogranin A assays. UKI NETS is establishing a data-base in association with a European registry.

BENEFITS OF MEMBERSHIP

- Invitation to and discount on registration fee to attend the UKI NETS annual conference
- Inclusive membership of the European Neuroendocrine Tumour Society (ENETS)
- Online access to the *Neuroendocrinology* journal
- Twice yearly newsletter from UKI NETS
- Updates on clinical trials and research developments
- Opportunity to apply for grants and fellowships
- Enjoy the opportunity to meet colleagues, gain support for your career, share research interests and exchange scientific knowledge with your peers

TERMS & CONDITIONS OF MEMBERSHIP

Please allow at least 10 working days for your application to be processed.

A trainee is defined as anyone who has not yet reached the date of completion of their training nor achieved consultant status. Trainees are eligible for a reduced subscription rate until completion of training is achieved when they will automatically pay the full member rate. The date of completion of training must be provided when applying for membership and the trainee must notify the UKI NETS Secretariat if completion is achieved before that date. The maximum period for this category of membership is 3 years, after which the trainee will automatically be moved to a full member rate.

The membership year runs from 1st January to 31st December. Applicants will be expected to pay the full year's membership fee in their first year, regardless of when their application is approved. The membership fee will not be reduced on a pro-rata basis. If you apply for membership during the period 1 September to 31 December, your membership payment will cover the remainder of that year and all of the following year. However, you will only receive journals for the following membership year.

Refunds cannot be provided for part of the membership year if membership is cancelled. Notification of cancellation of your membership must be made to the UKI NETS Secretariat and received by the end of the membership year.

Membership renewal notices will be sent approximately 1 month before the start of the membership year and as an UKI NETS member, you are expected to ensure that payment is made promptly. Members who have not paid the membership fee will not be entitled to vote at the AGM.

Members who have not paid their membership fee after a few reminders will be deemed as lapsed members and will not receive the newsletter, journal, mailings and discounted registration to the UKI NETS annual conference.

Members who have not paid their membership fee for one year or more must either re-apply for membership or pay all fees due since their last membership fee payment.

PRIVACY POLICY

By applying for membership, you permit UKI NETS and its professional secretariat provider BioScientifica Limited to process your personal details.

As an UKI NETS member, you will receive mailings and email alerts from UKI NETS on its own and related activities. Member details will not be provided to third parties. However, members of UKI NETS will enjoy membership of ENETS and receive *Neuroendocrinology*. Hence, your details will be shared with ENETS and the journal publisher Karger AG.
